Docket No.: 20140-00238-US

AMENDMENTS TO THE CLAIMS

This listing of the claims will replace all prior versions and listings of the claims in this application.

BEST AVAILABLE COPY

Listing of the Claims:

1. (Presently amended) A digital file forming a contract comprising:

a header package having rules defining sealed packages produced by a sealing party, a body containing at least a portion of the content of the contract; and a validating signature generated from said rules and said body according to a first key belonging to a validating party; and

- a sealing signature generated from said header package and said sealed packages according to a second key belonging to said sealing party.
- 2. (Previously presented) A digital file forming a contract according to claim 1 wherein said header package further comprises a unique header identifying a type of said sealed package and wherein said validating signature is generated from said rules, said body and said header.
- 3. (Previously presented) A digital file forming a contract according to claim 1 wherein said sealed package comprises a unique number generated by said sealing party and said sealing signature is generated from said header package, any of said sealed packages and said unique number.

Docket No.: 20140-00238-US

- 4. (Previously presented) A digital file according to claim 1 wherein said rules define one or more unsealed packages to be included in said sealed package, said body comprises a HTML file and one of the unsealed packages defined in the rules contains data for a field in the HTML file.
- 5. (Previously presented) A digital file according to claim 1 wherein said rules comprise a URL corresponding to the location for which each sealed package to be included in the contract can be obtained.
- 6. (Previously presented) A digital contract according to claim 5 wherein said URL is a CGI script for commanding a remote server to generate said sealed package.
- 7. (Previously presented) A digital contract according to claim 5 wherein said URL identifies the location of said sealed package.
- 8. (Currently amended) A contract management apparatus for validating a digital file const contract, said digital file having a header package which includes rules defining sealed packages, a body containing at least a portion of the contract, and a validating signature, comprising:

means for reading said rules and for identifying a validating party and a sealing party which created a sealed file of said contract;

first means for obtaining a first key belonging to said validating party cooperable with said validating signature generated from said rules and body to validate said header package;

second means for obtaining a second key belonging to said-sea sealing party cooperable with said sealing signature to validate said contract; and

means for iteratively validating any sealed packages contained in said contract using said second key and sealing signature.

9. (Previously presented) A contract management apparatus as claimed in claim 8 wherein said iterative validating means returns any data stored in said sealed packages.

- 10. (Previously presented) The contract management apparatus of claim 9 further comprising means for displaying said body contents and said returned data.
- 11. (Previously presented) A contract management apparatus for generating a digital file constituting a contract comprising:

means for obtaining a header package for said contract;

means for reading rules defining sealed data packages, and for identifying a sealing party and any sealed packages to be included in said contract;

means for obtaining said identified sealed packages;

means for generating a sealing signature from said header package and any of said sealed packages according to a first key belonging to said sealing party; and means for assembling said header package, sealed packages and said sealing signature into said digital file constituting a contract.

12. (Canceled)

13. (Previously presented) The contract management apparatus of claim 8, including one of a smartcard, a personal digital assistant, a personal computer, a terminal or an embedded system.

Docket No.: 20140-00238-US

14. (Currently amended) A computer product for storing instructions which are executed by a computer to validate a digital file having a header package which includes rules defining sealed packages, a body containing at least a portion of a contract and a validating signature, comprising:

reading said digital file and identifying a validating party and a sealing party which created a sealed package of said contract;

deriving a first key belonging to a validating party;

validating said header package using said first key and said validating signature; deriving a second key belonging to said sealing party;

a sealing signature from said header package; and

validating said digital file using said second key and said sealing signature.

- 15. (Previously presented) The computer product according to claim 14, further comprising instructions for deriving said sealing signature from a unique number contained in said header package.
 - 16. (Canceled)
 - 17. (Canceled)
- 18. (Currently amended) A computer product for storing instructions for a computer to execute the e steps of:

storing rules to describe a data package;

creating from said rules a data package containing a digital data file; merging said rules and said data package into a merged file;

Application No. 09/576,223

Docket No.: 20140-00238-US

creating a package validity signature from said merged file to prevent unauthorized use of said digital file; and

generating a unique number identifying said digital file;

merging said package validity signature, said merged file and said unique number; creating a sealing signature from said merged files; and

sealing said merged files with said sealing signature to produce a sealed package.

- 19. (Previously presented) A computer product according to claim 18 wherein said rules comprises a plurality of elements which point to a location on said computer containing a required package.
- 20. (Previously presented) The computer product according to claim 19 wherein said rules define a scaling signature for said sealed package.
- 21. (Previously presented) The computer product according to claim 18 wherein said merged files are compressed as a single file.
